DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6-4-2007 has been entered.

The amendment filed on 6-4-2007 is acknowledged. Claims 31, 34, 36, 38 and 43-45 have been amended. Claims 31-32 and 34-35 are pending and currently under examination.

Objections Withdrawn

Oath/Declaration

The objection to the oath or declaration as being defective by containing Non-initialed and/or non-dated alterations is withdrawn in light of the declaration filed on 6-4-2007.

Claim Rejections Withdrawn

The rejection of claims 31-32 and 34-45 under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Bizzini (U.S. Patent 4,594,336 -- IDS) is withdrawn. Said reference does not disclose an active neurotoxin which possesses mouse lethality of 3.3×10^5 LD₅₀/mg or greater. It should be noted that this rejection may be reinstated depending on the resolution of the new matter rejection set forth below.

Art Unit: 1645

The rejection of claims 31-32, 35-41 and 44-45 are rejected under 35 U.S.C. 102(e) as being anticipated by Arnon (U.S. Patent 5,562,907 -- IDS) is withdrawn in light of Applicant's arguments.

New Grounds of Rejection

35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 31-32 and 34-45 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. This is a new matter rejection.

Applicant has amended claims 31 and 38 to recite "wherein the active neurotoxin possesses mouse lethality of 3.3×10^5 LD₅₀/mg or greater ..." This phrase does not appear in the specification, or original claims as filed. The portion of the specification cited by Applicant provides support for only a TeTx reconstituted with either native HC and LC or native HC and recombinant LC but for all the active neurotoxins encompassed by the instant claims. Therefore this limitation is new matter. Moreover, the newly added range has no upper limit and therefore cannot be supported by two data points.
